### Explanation of Activities this Quarter and Additional Notes

The low bidder on the project was deemed unresponsive and project was not awarded. The contract was repackaged to be re-advertised in January 2019. Bid amounts have been on the increase on roadway construction projects. Taking this into consideration the repackaged contract included an additive bid item for a portion of the project limits between Morrison Creak and the southerly terminus. In the event that contract bids exceed the budget amount, the additive bid item will be removed from the project.

The project is anticipated to have an approved construction contract mid-May 2019. An estimate of expenditures for fiscal year 19/20 are shown starting July 1, 2019.

Explanation of Activities this Quarter and Additional Notes

The project is currently in the environmental review stage for the hybrid alternative. The hybrid alternative consists of widening Madison Avenue to six lanes with some portions of Madison Avenue remaining at four lanes. This alternative is the preferred alternative due to less right-of-way and tree impacts than associated with the six lane project. The traffic study for the hybrid has been completed.

A public outreach and community input process will be conducted as the environmental review stage continues. This public outreach process is expected to move forward in the spring of 2019.
South Watt Avenue/Elk Grove-Florin Road Improvements, Phase 1 – Florin Road to State Route 16

The project is currently in the preliminary phase of work. Roadway base survey is complete, a preliminary striping plan layout has been prepared, and coordination with utilities and affected agencies is underway to determine potential utility conflicts. Environmental review will be initiated by the end of the fiscal year. Preparation of request for proposal for design services of the entire project including the bridge at Morrison Creek is currently underway.

Overall City Management and Administration Labor for Intermodal projects continuing through FY19 Q2.

Planning activities for light rail relocation and streetcar continuing through FY19 Q2.

This work was not previously included in prior quarterly reports (errant omission) and had been contracted in FY18 Q3,
The selection of a consultant team for the project has been completed and their contract was approved by City Council. Work in the last quarter included negotiating with the selected consultant, coordinating with Caltrans for authorization to award the contract, compiling existing plans within the project’s limits, and securing encroachment rights and documentation from Caltrans to begin preliminary engineering tasks. The City has also continued to coordination with Caltrans to ensure that the I-5 Richards Boulevard Interchange is optimized with other planned improvements on Interstate 5, including participation in the kick-off meeting for the I-5 Managed Lanes Project.
